

Infrastructure

Transport infrastructure

Razgrad District is a major international and national transport junction connecting Central Europe with the Black Sea and Asia. In the region crosses the international road E-70 Ruse-Varna, matching the river (the Danube) and sea (Black Sea) ports of the Bulgarian territory and II-class state roads II-49 Tutrakan-Kubrat-Razgrad-Targovishte and II-23 Ruse-Kubrat-Zavet-Isperih.

Through the territory of District Razgrad passes railway Ruse - Varna, which is 5 km away from Razgrad town, in close proximity to one of the industrial areas of the city. The line serves not only national but also international flows and is the second component of the regional transport corridor Ruse - Varna. The total length of railway line in the field is 92 km.

In the period 2007 - 2011, were rehabilitated and reconstructed sections of the second and third class roads with projects under the Operational Programmes of The EU. Two sections of municipal roads are with increased class. As a result, the length of class roads increased by 5 km in the period - from 283 km, it is 288 km. As a result of activities carried out, by 2011 about one-third of the population of Razgrad with improved transport access to settlements.

Main priorities for the District Razgrad for the next programming period - 2014 - 2020 is the construction of high-speed four-lane road from Ruse to highway "Hemus" / project is included in the EU Strategy for the Danube Region 2014 - 2020 years / and building "Hemus" highway that will be near Razgrad District.

Water supply and sanitation

In Razgrad District operate two Associations for Water Supply and Sanitation with state participation and one is municipality property.

In Razgrad city related to public sewerage are Razgrad, Isperih, Kubrat and Loznitsa. In Zavet town and Brestovene village there is partial sewerage system for rainwater. Wastewater plants with mechanical and biological stage operating in the towns of Razgrad and Loznitsa and only with mechanically stage - and Isperih and Kubrat. In municipalities Samuil, Zavet and Tsar Kaloyan there are not built wastewater plants.

There are big projects under the Operational Programme "Environment" for the water cycle of most municipality centers - Razgrad, Isperih, Kubrat and Loznitsa. There are and some implemented projects, funded by the Program for Rural Development and National Environmental Protection Fund.
